Shrivardhan, Maharashtra, India

CORE COMPETENCIES

REST API Architecture | Backend Engineering | React.js / Next.js | AWS Cloud
Database Design & Optimization | CI/CD Automation | Security & Auth | Real-Time Systems
Docker & DevOps | Redis Caching | Payment Gateway Integration | Agile Delivery

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 2+ years of experience architecting and shipping scalable web applications across fintech, fantasy sports, B2B supply chain, home security SaaS, and e-commerce domains. Proficient in Node.js, Express.js, React.js, and Next.js with strong command over MongoDB, MySQL, and PostgreSQL. Adept at cloud-native delivery on AWS, container-based workflows with Docker, and end-to-end security hardening. Consistent record of boosting API performance, enforcing code quality, and collaborating across cross-functional teams to meet production deadlines.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Backend: Node.js, Express.js, REST APIs, Repository Architecture, Microservices Basics

Frontend: React.js, Next.js (SSR/SSG), Redux, HTML5, CSS3, Bootstrap

Databases: MongoDB, MySQL, PostgreSQL, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda, API Gateway, CloudWatch, CloudFormation), Docker, Nginx, CI/CD

Auth & Security: JWT, OAuth, RBAC, AES-256 Encryption, Rate Limiting, XSS/CSRF Protection

Testing & Quality: Jest, JMeter, SonarQube, SonarLint, Swagger

Tools: Git, GitHub Actions, AWS CodePipeline, CodeBuild, Sentry, Winston/Pino

Real-Time: Socket.IO (WebSockets), Background Jobs, Queue Management

PROFESSIONAL EXPERIENCE

Full Stack Developer · **Mypcot Infotech, Mumbai** · January 2024 – Present

- Engineered scalable RESTful APIs using Node.js and Express.js powering high-traffic production systems across 5+ client domains.
- Architected database schemas in MongoDB, MySQL, and PostgreSQL; applied indexing and Redis caching to cut query response times significantly.
- Containerized backend services with Docker and provisioned cloud infrastructure on AWS (EC2, S3, Lambda, CloudWatch).
- Established CI/CD pipelines via GitHub Actions, enabling automated testing and zero-downtime deployments.
- Crafted responsive React.js dashboards and admin panels (TypeScript) alongside SEO-optimized Next.js landing pages.
- Hardened application security through JWT, RBAC, AES-256 encryption, rate limiting, and XSS/CSRF mitigation.
- Upheld code quality via SonarQube/SonarLint reviews and authored comprehensive API documentation with Swagger.

KEY PROJECTS

Alchomap — B2B Alcohol Distribution Platform — *Node.js, Express.js, React.js, Next.js, MongoDB, GitHub Actions*

- Architected RESTful APIs for user onboarding, enquiry management, and distributor-retailer workflows covering city-based supply chain mapping.
- Wired real-time KYC verification via Zoop Aadhaar eSign API with support for multiple license-type verification workflows.
- Structured MongoDB schemas with pincode-based search and intelligent enquiry routing for efficient lead distribution across regions.
- Enforced RBAC across distributor, retailer, and admin roles; shipped SEO-optimized landing pages via Next.js server-side rendering.
- Launched CI/CD automation, API versioning for backward compatibility, and unit tests backed by SonarQube static analysis.

Gaminggle — Fantasy Sports Platform — *Node.js, Express.js, MongoDB, Redis, Docker, AWS EC2*

- Spearheaded backend API development (Repository Architecture) for contest management, user workflows, and financial transaction processing.
- Boosted API throughput by applying Redis caching strategies that substantially reduced database load under peak-traffic conditions.
- Safeguarded sensitive financial data with AES-256 encryption aligned to PCI DSS compliance requirements.
- Containerized all services with Docker; streamlined deployment cycles through GitHub Actions CI/CD pipelines.
- Performed load testing with JMeter, resolved performance bottlenecks, and monitored production health on AWS EC2 via CloudWatch.

Cloudcard — Cloud Storage & Chat Platform — *React.js, REST API Integration*

- Crafted a pixel-perfect, fully responsive marketing landing page in React.js to showcase platform capabilities and drive user acquisition.
- Delivered a full-featured admin panel with modular, reusable React.js components for overseeing users, storage quotas, and chat activity.
- Wired backend REST APIs throughout the admin panel, enabling live data dashboards, user management, and platform health monitoring.

TAQSET (BNPL) — Islamic Banking Benefits Platform — *Node.js, Express.js, React.js, Next.js, MySQL, PostgreSQL, Sequelize, Fawry*

- Built RESTful APIs for payment transfers, utility payments, and healthcare allowances using a clean repository-pattern architecture.
- Modelled MySQL schema via Sequelize ORM and shipped three web panels (admin, service provider, company) in React.js TypeScript.
- Wired Fawry payment gateway for customer and merchant transactions; rolled out SEO-optimized Next.js pages with server-side rendering.
- Launched a usage-based offer management system supporting tiered free and premium profile-level offerings.

Shuff-Group — Home Security SaaS Platform — *Node.js, AWS Lambda, API Gateway, Redis, MongoDB, CloudFormation*

- Leveraged AWS Lambda and API Gateway to power serverless backend processing; provisioned infrastructure via CloudFormation with full CI/CD.
- Tuned performance using Redis caching, lazy loading, and CDN integration; tracked production health continuously via AWS CloudWatch.
- Fortified the platform with JWT auth, RBAC, encryption, rate limiting, input validation, and XSS/CSRF protection; audited via SonarQube.

FREELANCE PROJECTS

Green Vegease — Online Vegetable Retail Platform — *Node.js, Express.js, PostgreSQL*

- Spun up REST APIs for product catalog, cart management, and order processing for a live green vegetables retail platform.

- Modelled and tuned PostgreSQL schemas for inventory, orders, and users, ensuring efficient query execution under concurrent load.

EnjoChem — Internal ERP System — *Django, PostgreSQL*

- Delivered REST APIs using Django for an internal ERP system covering procurement, inventory, and reporting workflows.
- Structured relational data models in PostgreSQL and enforced rigorous validation and business logic to guarantee data integrity.

PERSONAL PROJECTS

Realtime Chat App — *Node.js, Express.js, React.js, MySQL, Socket.IO, JWT*

- End-to-end messaging platform supporting real-time one-to-one and group chat, file sharing, media transfer, and emoji reactions via Socket.IO.

Expense Tracker — *Node.js, Express.js, MySQL, HTML/CSS/JS, RazorPay*

- Financial tracking tool with income/expense reports and pie charts; wired RazorPay for secure premium membership transactions.

ZipToDocument Converter — *Node.js, Express.js, React.js, MongoDB, AWS S3*

- MERN utility that extracts ZIP archives, maps file locations into structured PDFs, and stores output securely on AWS S3.

E-Commerce Platform — *Node.js, Express.js, React.js, MongoDB, RazorPay*

- Full MERN e-commerce solution with product catalog, cart management, and RazorPay payment processing.

EDUCATION

B.Sc. in Information Technology · University of Mumbai · 2020 – 2023 · CGPA: **9.72 / 10**

ACHIEVEMENTS & RECOGNITION

- Recognised as Employee of the Month 5 times at Mypcot Infotech for consistent high performance and on-time delivery.
- Secured 2nd rank at the district-level project presentation competition held in Ratnagiri.
- Coordinated the college team for the prestigious Avishkar Research Convention.
- Honoured as Student of the Year for the academic year 2022-23 at Mumbai University.
